Please join Project Accessible Oral Health in its mission to raise awareness of and help make change happen for the more than 57 million people with disabilities in our nation who have unjustly been denied or unable to access quality oral healthcare.

Project Accessible Oral Health is the first national nonprofit to connect a diverse consortium of dedicated stakeholders in pursuit of equal access to quality oral healthcare. It operates under The Viscardi Center, a network of organizations that educate, employ and empower children and adults with disabilities.

Project Accessible Oral Health and its interconnected partners are uniquely positioned to end this injustice through three strategic pillars:

**Policy**

Identify shortfalls and solutions in governmental policy, on local, state and federal levels, relating to access to oral healthcare for people with disabilities.

**Education**

Create the first centralized digital hub to develop and make available core competency materials for:

- Children/teens/adults with disabilities and their caregivers;
- Patient advocates, third-party payers, and the non-dentist health provider;
- Current and future dentists and dental hygienists.

**Marketing**

Raise awareness of the urgency of this issue and its impact on people with physical and developmental disabilities, as well as our nation’s healthcare system.

Every member of our nation’s 57 million strong disability community deserves the same oral healthcare as their non-disabled peers.
